```
dbutility  reload  <data_source>  <data_source>_control_tables.sav
```

Verifying the results

You can verify that the dbscriptfixup program successfully updated your control tables by executing a redefine command for the data source with the −R option. If the command finds no changes in the table layouts, then you know that you safely use the Client Configurator and that all the changes that you made via user scripts are preserved.

Appendix: Installation Results

This section includes lists of files that are installed with each product.

Files Installed with DATABridge Host

This section describes each of the files installed with DATABridge Host software.

DATABridge software is organized into the following directories:

Directory	Description
OBJECT/DATABRIDGE/=	Executable files
SYMBOL/DATABRIDGE/=	Source files
WFL/DATABRIDGE/=	WFL job files
DATA/=	Parameter and data files
PATCH/=	Source files
INSTALLS/=	Contains the executable file for installing DATABridge Enterprise on a ClearPath PC or Windows server
